

## Focusun Flake Ice Machine

Flake ice is irregular ice flake at the size of about 40×40mm and thickness around 1.5-2.5mm. The characteristics of the flake ice make it widely used in food preservation in supermarket, meat processing industry, food processing industry, aquatic products processing industry etc.

Focusun fresh water flake ice makers are divided into four major categories, including small capacity flake ice machine (daily production ranging from 500 kg -2,500 kg), medium capacity flake ice machine (daily production ranging from 3,000 kg - 20,000 kg), large capacity flake ice machine (daily production ranging from 25,000, -60,000) and containerized flake ice making plants (two models: 20-foot standard container and 40-foot standard container).

### Small Capacity Fresh Water Flake Ice Machine

Focusun small capacity air-cooled flake ice maker plays an important role in small scale seafood freshness preservation in supermarket, food processing industry, chemical industry, meat processing and aquaculture processing industry. With advanced technology and the easiness of operation, it brings much convenience to customers.

### Medium Capacity Fresh Water Flake Ice Machine

With reliable quality and performance, Focusun medium capacity fresh water flake ice machine can withstand more than 12 years' trouble-free operation. The flake ice it produced has many advantages such as large contact area and high cooling speed and easy to crush and mould, thus flake ice making machines have become a good choice for many clients.

### Large Capacity Fresh Water Flake Ice Machine

With years of experience, Focusun large capacity industrial freshwater ice flake makers has been widely used in various fields like marine fishing, chemistry, medicine, supermarket and keeping freshness for vegetables, dairy products, seafood etc. Owing to good quality and perfect service, we win trust from clients China and all over the world.

### Containerized Freshwater Flake Ice Machine

Both 20 foot and 40 foot containerized flake ice makers are available in Focusun. In order to optimize the ice making process, Focusun puts all equipments of medium and large capacity flake ice plants in the container, as well as other equipments like ice storage room and ice conveying system so that it can work as a movable ice making plant.

### Land Used Seawater Flake Ice Machine

Focusun land used seawater flake ice making plant is mainly suitable for coastal areas, and it directly uses seawater to produce ice whose salt content is much higher than that of the fresh water ice. With non-corrosive materials and specially-designed condenser in it, the ice making machine can meet the requirements of using seawater to produce ice.

### [Marine Used Seawater Flake Ice Machine](#)

After making thorough research on the global market demand and climate conditions in different areas, Focusun develops marine used flake ice maker in order to provide professional service for marine cooling and ice-making operation on the boat. We have become professional supplier of flake ice making plants and won good feedbacks from customers in related fields like long range fishing industry.
