

Generator

Turnkey Solutions

As the most professional ice making plant supplier in China, Focusun can systematically provide customers with a series of comprehensive ice-making solutions. Once you have the idea of building an ice-making project, if necessary, our experienced engineers will provide you with professional projects proposals.

Generator

In many countries around the world, electricity use is limited due to many reasons such as the electricity price, voltage stability, the continuity of power supply and other factors. As a result, the diesel generator is your best choice. Choosing a suitable diesel generator as your power source for your ice maker, or as a standby power equipment is the sufficient condition to ensure the effective and quick start of a ice-making project.

Our technical engineers are willing to recommend the suitable diesel generator for you according to your ice-making capacity. We have listed the commonly used models for your reference.
